THANAPONG LIKHITPARINYA

Phone : +49 15223649360 **Address** : Elisabethstraße 13, 52062 Aachen

Nationality : Thai **Linkedin** : linkedin.com/in/thanaponglik

Date of Birth : 03 December 1999 **Github** : github.com/billythanapong

Email : thanapong.likhitparinya5@rwth-aachen.de

PROFESSIONAL PROFILE

Graduate student in Data Analytics and Decision Science at RWTH Aachen University, with 2.5 years of experience as a digital transformation engineer. I'm highly analytical and results-driven, with a strong foundation in data science, machine learning, and RPA. Passionate about applying python, statistical modeling, and AI frameworks to create data-driven solutions and deliver measurable impact.

TECHNICAL SKILLS

Programming & Analytics : Python, Jupyter Notebook, PostgreSQL, Alteryx, Tableau

Data Stack : Pandas, Pytorch, Git, Matplotlib, Seaborn, Sci-kit Learn, XGboost, Streamlit, MLFlow

IT Tools : UiPath, Power Automate, Power Apps, MS office (Word, Excel, Power Point)

Language Skill : English (C1), Thai (Native), German (A1)

WORK EXPERIENCES

Digital Transformation Engineer

Feb 2023 - Jul 2025

AGC Flat Glass (Thailand) Inc. | DX/AI Department

- Led end-to-end digital transformation initiatives by researching and mapping business processes to uncover improvement opportunities, and applying digital tools to enhance operational efficiency.
- Optimized inventory management through statistical techniques and improved reorder point (ROP) calculations using Python, resulting in a 39% reduction in inventory costs.
- Developed and implemented digital skills training strategies, increasing the proficiency of over 20% of employees in utilizing digital tools, and delivered quarterly progress reports to top management.
- Supported data analytics operations by developing and maintaining Tableau dashboards and Tableau server to fulfill ad-hoc and regular reporting requests.

Research Assistant

Mar 2019 - Jun 2022

King Mongkut's University of Technology Thonburi

- Conducted Multigrid Nuclear Fusion Simulation thesis research, **published in the AIP conference 2024**, predicting neutron emissions using XOOPIC (a PIC user-defined code based on Unix).
- Contributed to designed and modeled accelerator-driven system (ADS) nuclear reactors using Monte Carlo-based simulation tools like FLUKA and SERPENT.
- Developed Python-based code to analyze data and evaluate ADS performance, collaborating closely with the team.

EDUCATION

Master's in Data Analytics and Decision Science **Oct 2025 - Present**
RWTH Aachen university

Data Science Immersive (Bootcamp) **Aug 2022 - Nov 2022**
General Assembly x True Digital Academy

Bachelor's in Mechanical Engineering **Jul 2018 - Jun 2022**
King Mongkut's University of Technology Thonburi
GPAX : 3.37 (Second-class honor)

CERTIFICATIONS

- Google Advanced Data Analytics
- Data Science Immersive Certificate (Scholarship) - General Assembly x True Digital Academy

INTERESTS

- **Bootcamp Projects :**
  - Co-developed a classification model to detect depressed individuals based on scraped Reddit posts, achieving an accuracy rate of over 75%. The project utilized Python in a jupyter notebook, leveraging API-based data collection and text processing.
  - Developed a streamlit web application for Thai license plate recognition using YOLOv5 by applying object detection techniques in Python.

- **Interests** :
  - Write data science blogs to share knowledge, enhance technical skills, and practice data storytelling.
  - Volunteer in organizing English skill development programs for Thai secondary school students, focusing on practical communication skills.
